SkyBrowser V2

Your Xbox controller is now your mouse and keyboard - every button explained.

Diagram key

Badge	Control	What it does
1	Left stick	Fast mouse cursor.
2	Right stick	Precise mouse cursor.
3	D-pad	Up / Down: volume (hold to repeat). Left / Right: arrow keys - tap skips video, hold keeps seeking.
4	A	Left click.
5	B	Right click.
6	X	Hold to drag: hold X + move a stick, release to drop.
7	Y	On-screen keyboard on / off.
8	Select	With Start (9): driver on / off. It beeps: high = on, low = off.
9	Start	With Select (8): driver on / off. With Y (7): power menu - hold Start first.
10	LB / LT	Back / scroll up (hold to repeat).
11	RB / RT	Forward / scroll down (hold to repeat).

Every feature in detail

Control	Press / hold	What happens
Left stick	Move	Mouse cursor, fast - for crossing the screen.
Right stick	Move	Mouse cursor, precise - for small targets.
A	Tap	Left click.
B	Tap	Right click.
X	Hold + move stick	Drags: release X to drop. A is ignored mid-drag so it never drops early.
Y	Tap	On-screen keyboard on / off. Clicking its keys needs the Admin launcher.
LT / RT	Hold	Scroll up / down. Hold to keep scrolling.
LB / RB	Tap	Browser back / forward.
D-pad up / down	Tap or hold	Volume up / down. Hold to keep changing it.
D-pad left / right	Tap or hold	Arrow keys. Tap skips video back / forward, hold keeps seeking.
Start + Y	Hold Start, tap Y	Power menu (Shut down, Restart, Sleep, Settings).
Select + Start	Together	Driver on / off with a beep. Use before launching a game.
Allow-list	Optional file	whitelist.txt limits the driver to chosen programs; empty = everywhere.

Good to know

- Run only **one copy** at a time - quit the old one in Task Manager first.
- The app has **no window**; it runs quietly. End **SkyBrowser.exe** in Task Manager to stop it.
- Use **SkyBrowser Admin.bat** when you want clicks to reach the on-screen keyboard.
- For the power menu, always **hold Start first, then press Y**.

About

SkyBrowser V2 - October 2026. Single ~208 KB file, about 2.5 MB of RAM, pure Rust with no downloads.
